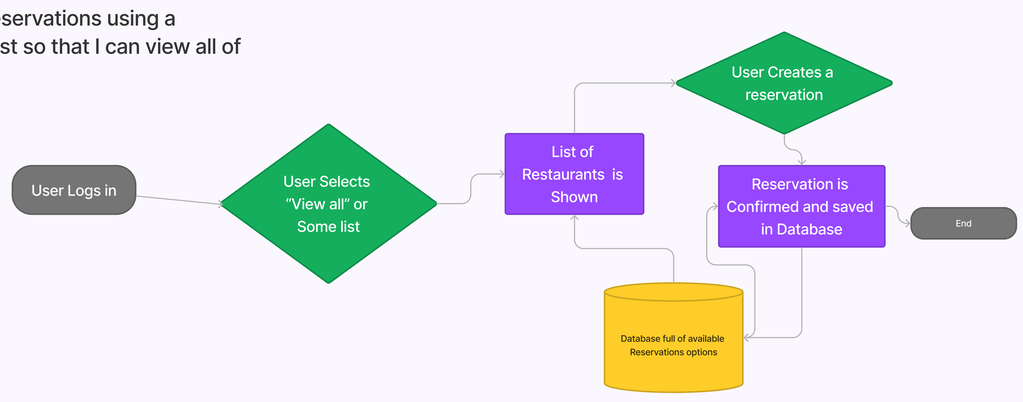
Diagram

User story 1:

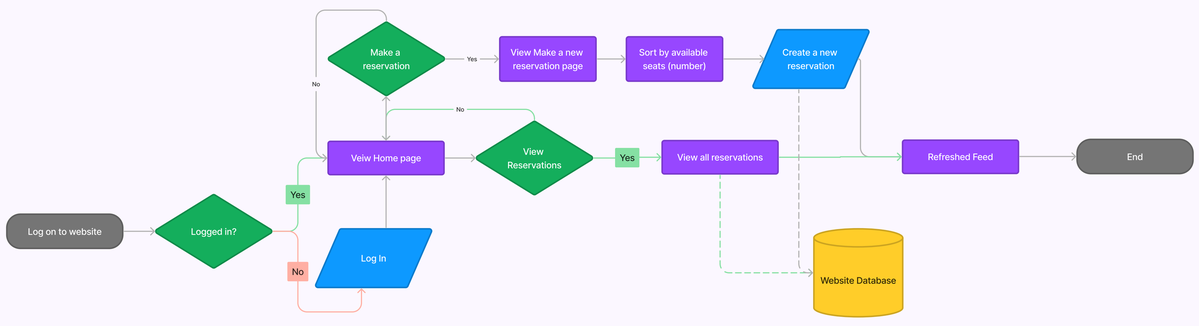
As a user, I want to be able to see available reservations using a scrollable list so that I can view all of them.



Diagram

User story 2:

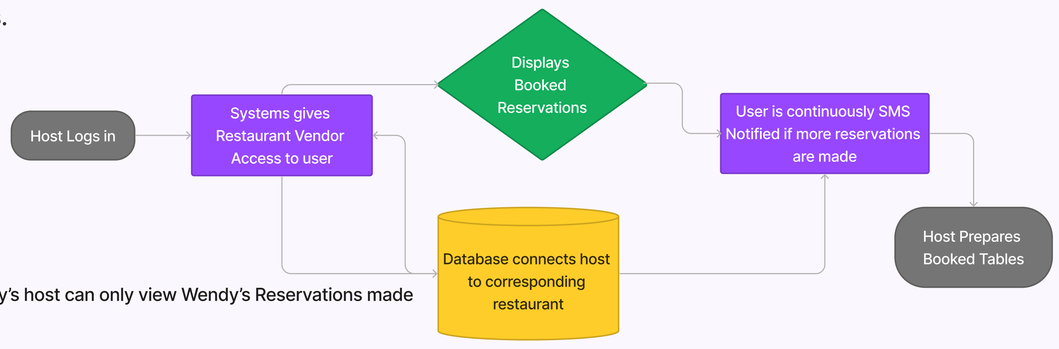
As a parent, I need to reserve a table at a restaurant for my kids birthday party so the whole family can eat together.



Diagram

User story 3:

As a waiter I need a way to view reservations so that I can prep the tables.

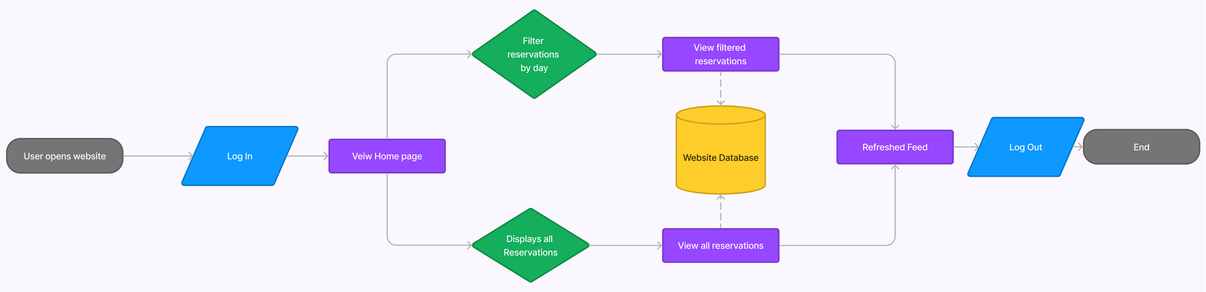


E.g. Wendy's host can only view Wendy's Reservations made

Diagram

User story 4:

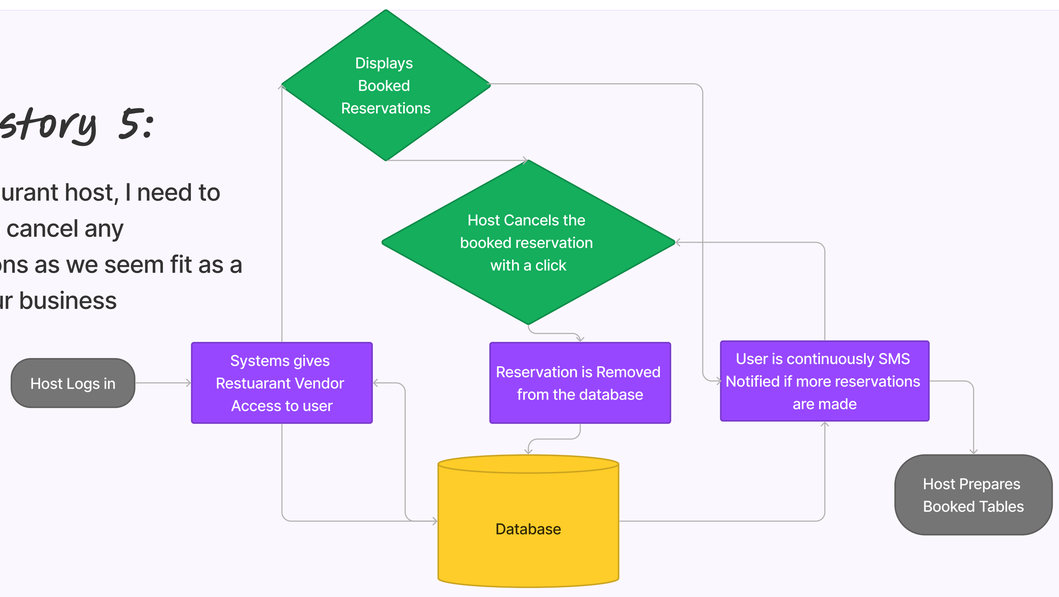
As a manager, I need to see how many reservations there are so I can get a sense of how much staff I will need.



Diagram

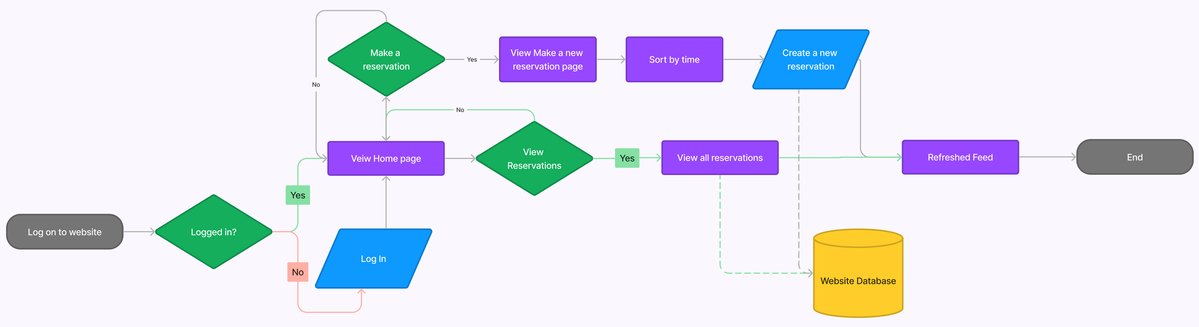
User story 5:

As a restaurant host, I need to be able to cancel any reservations as we seem fit as a right to our business



User story 6:

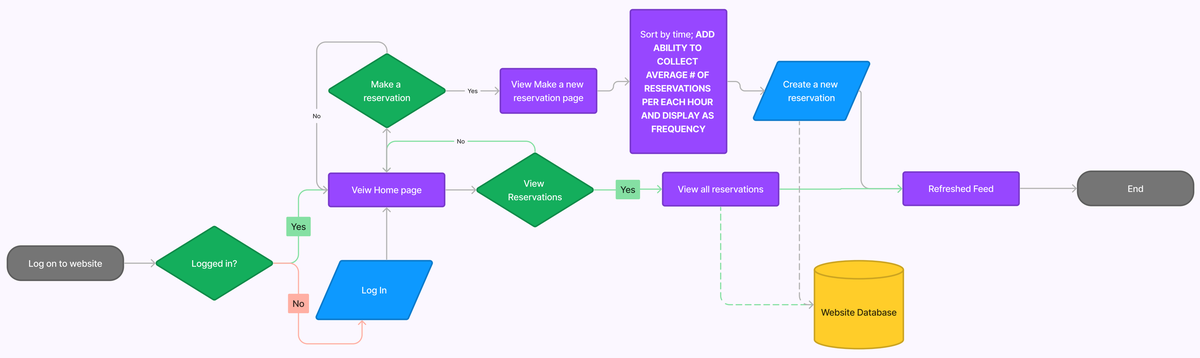
As a student, I want to be able to reserve a table after my night class



Diagram

User story 7:

As a student, I want to be able to reserve a table after my night class



Diagram

User story 8:

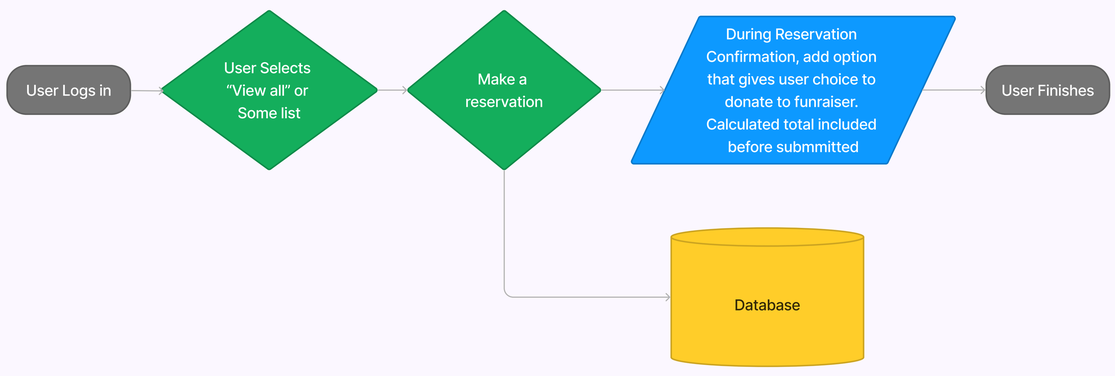
As a Moderator, I want our website database to be secure, so that the users passwords are safe.

The Site will be encrypted (SSO) to make sure all personal/ sensitive information will be protected

Diagram

User story 9:

As a UNCC student I would like to implement a student fundraiser system



Diagram

User story 10:

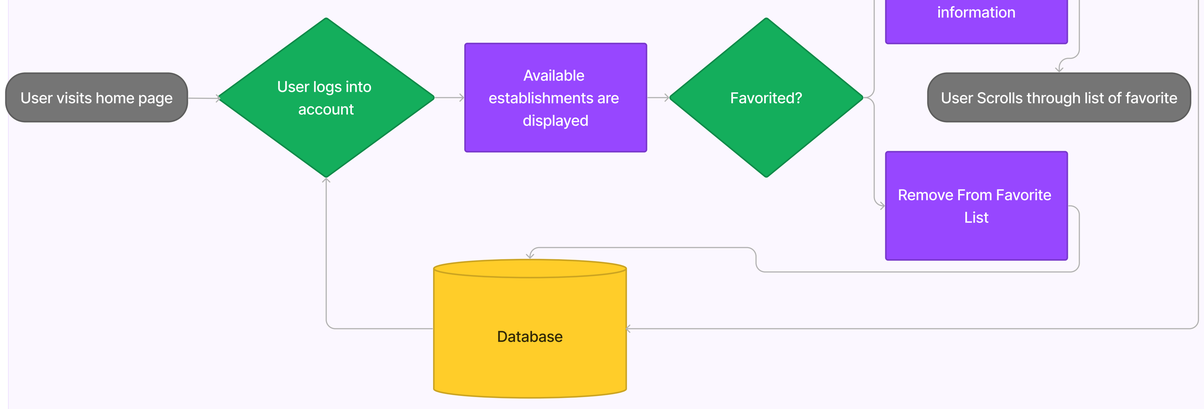
As a UNCC student, I would like the layout to be clean, so that I can easily navigate it.

The Site will be designed fully for easy accessibility, and will have an easy navigation menu to help guide users to their desired functions

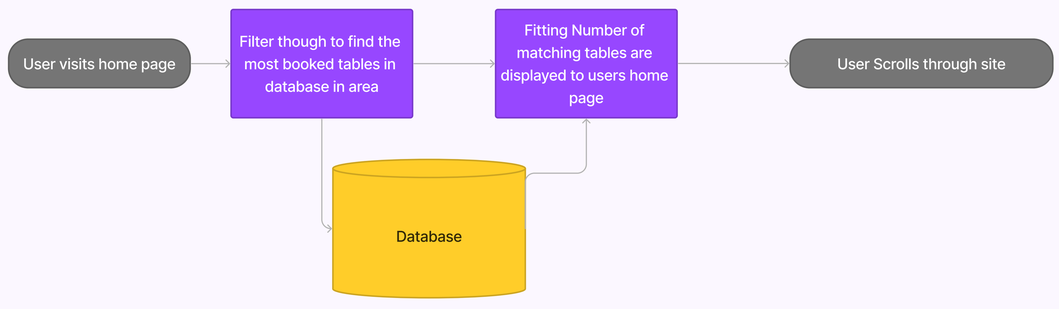
Diagram

User story 11:

As a UNCC student, I would like to be able to create an account, so I can save my preferences.



Diagram

User story 12:


As a Moderator, I would like the page to contain a list of popular tables
